What helped you learn the material in the course? (Please explain)		Additional comments. (Please explain)
I was able to retain the information I learned with the way she taught class. I only wish I could have her as my professor in my next cosc class		
I knew most material but I did learn a lot with Access. The textbook was great to use.		MyITLab is horrible. Too many issues trying to do pre/post testing in that program.
What helped me the most is the class work we did in class, having her explain step by step and then doing the homework. Mrs. Royal always explained stuff to us to where we could understand, she didn't ever make us feel rushed because she knew the stuff she took her time making sure each student saw and understood a step in whatever process we were doing.		She has a great attitude and was always keeping us updated and you could contact her anytime and she would never take long to respond. I enjoyed this semester with her. I would take another one of her classes.

Scripted lessons and detailed instructions in textbooks		

Dr. Royal is a very great instructor and very confident in what she is teaching,
